Estymacja gęstości prawdopodobieństwa		Ocena:

1. Wygenerowałem próbki według instrukcji.

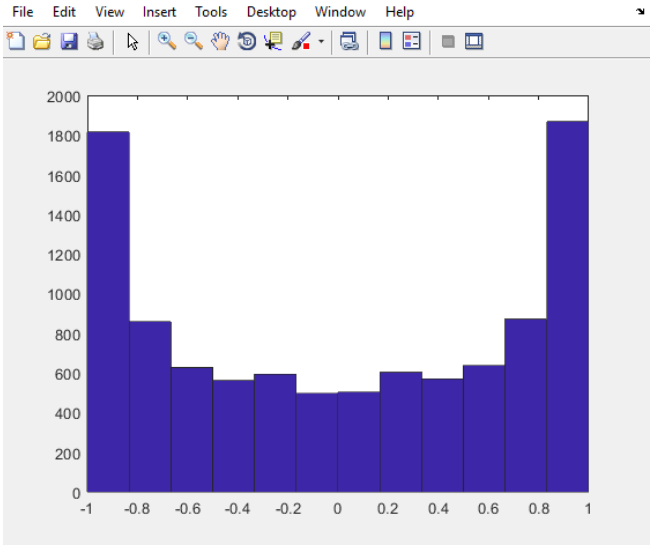

Wykres sygnału

2. Histogram dla n=12:

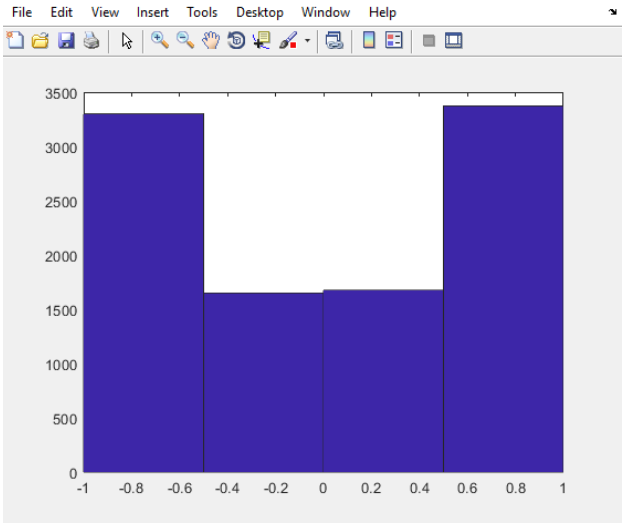

3. Histogram sygnału sinusoidalnego:

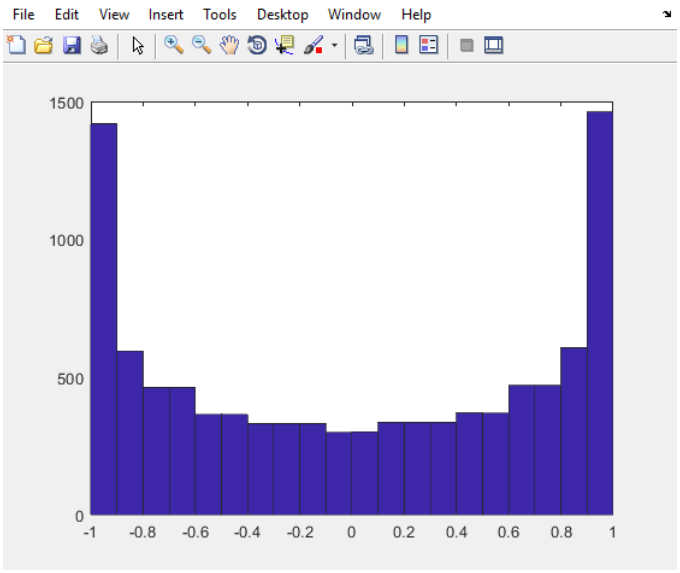

dla n = 12

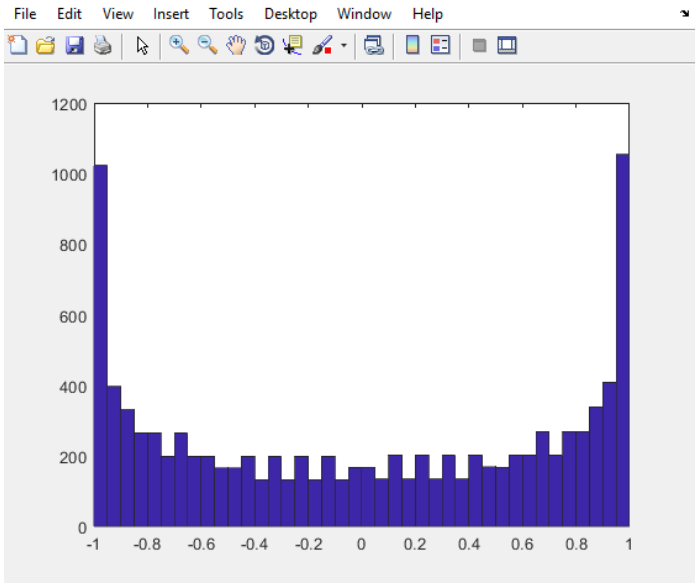

dla n= 4

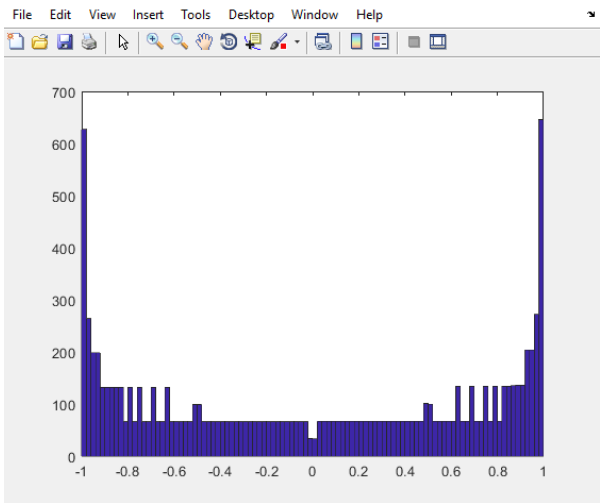

dla n = 20

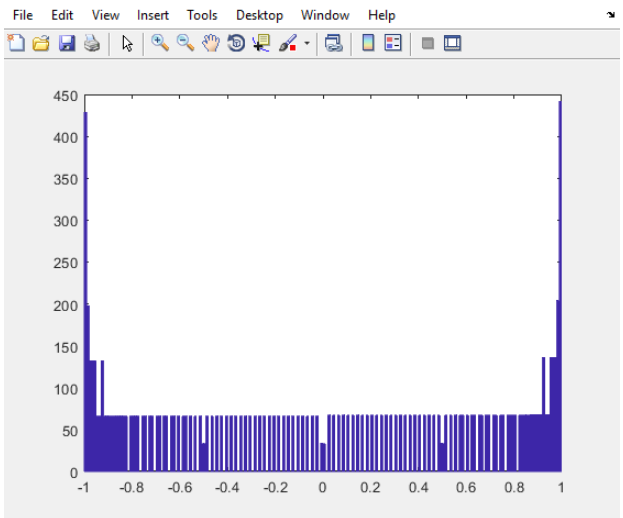

dla n= 40

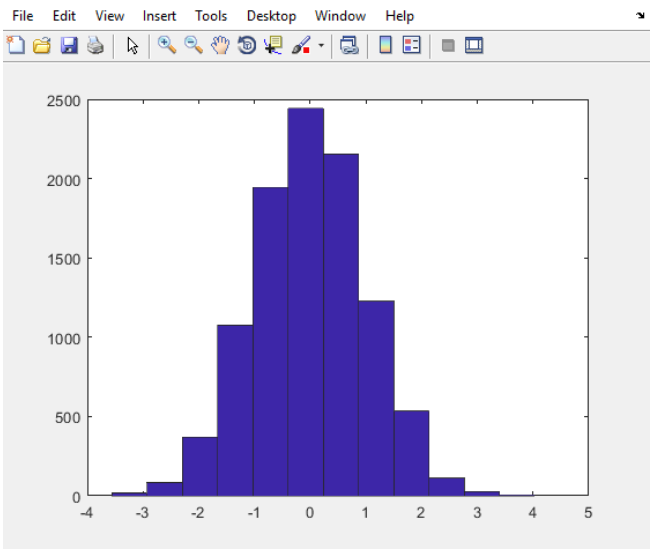

dla n = 100

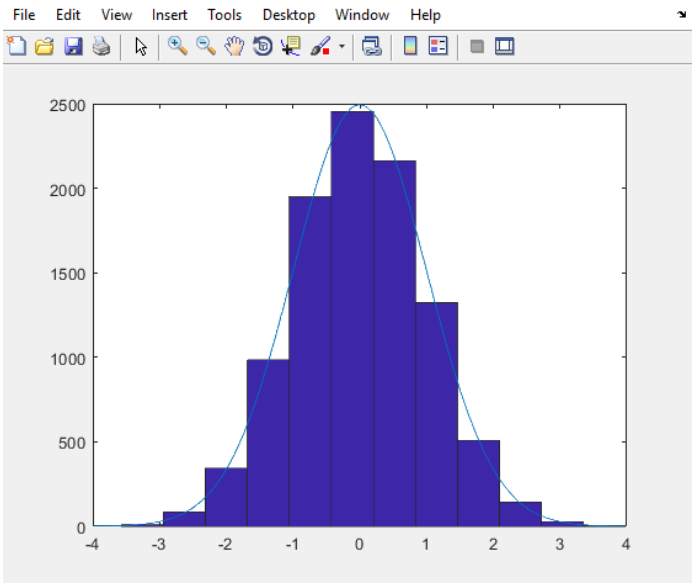

dla n= 200

4. Histogram rozkładu gaussowskiego
dla sigma = 1 i mi = 0:

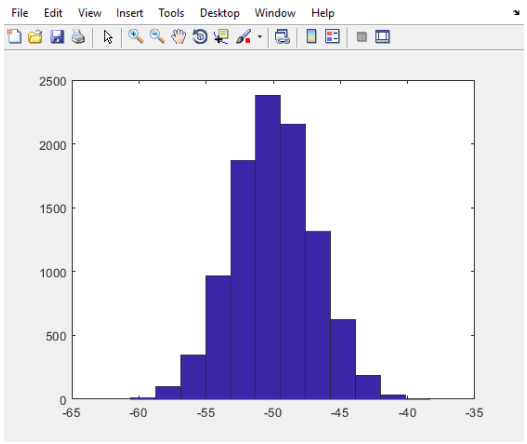

z krzywą Gaussa:

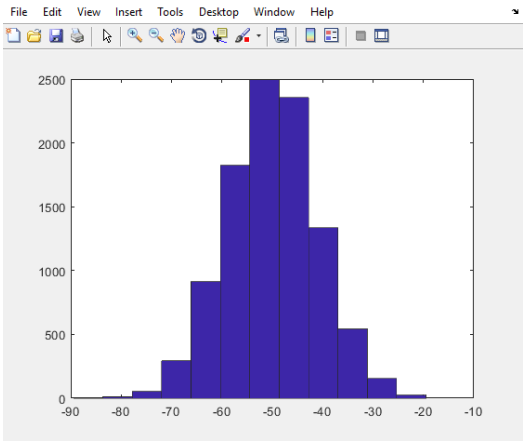

Wyniki w przybliżeniu pokrywają się z teoretycznymi

5. Histogram dla:

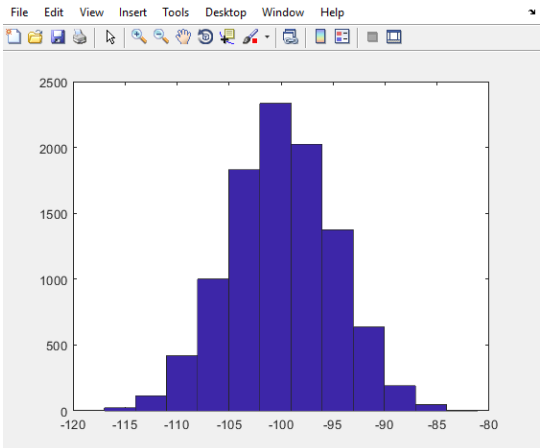

sigma = 3 oraz mi = -50

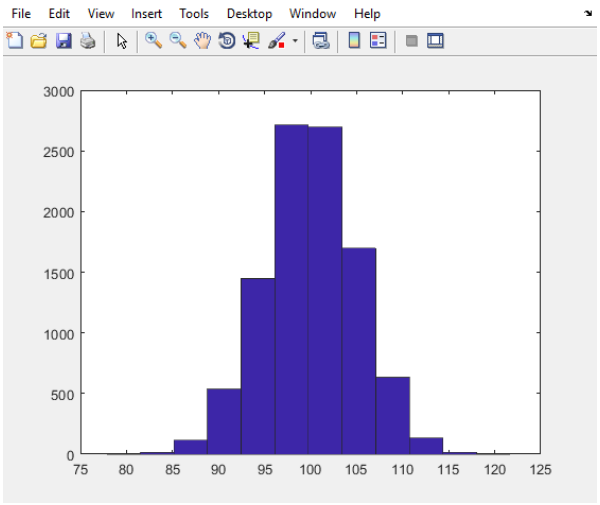

sigma = 9 oraz mi = -50

sigma = 3 oraz mi = -100

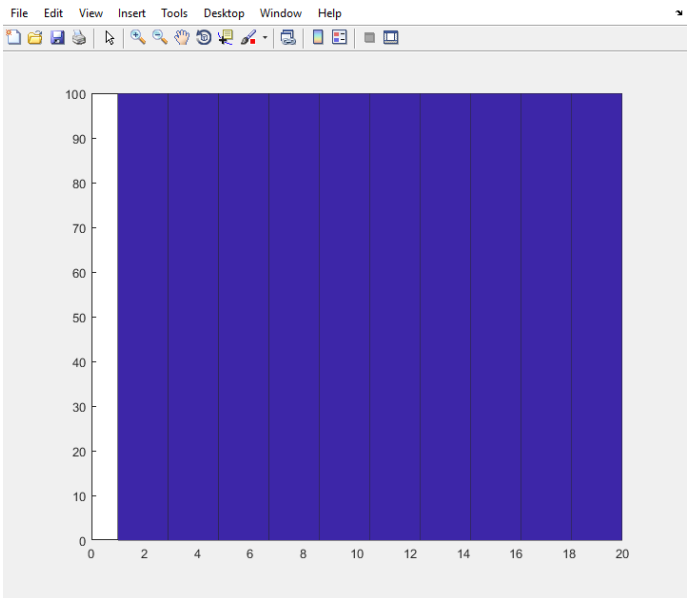

sigma = 9 oraz mi = 100

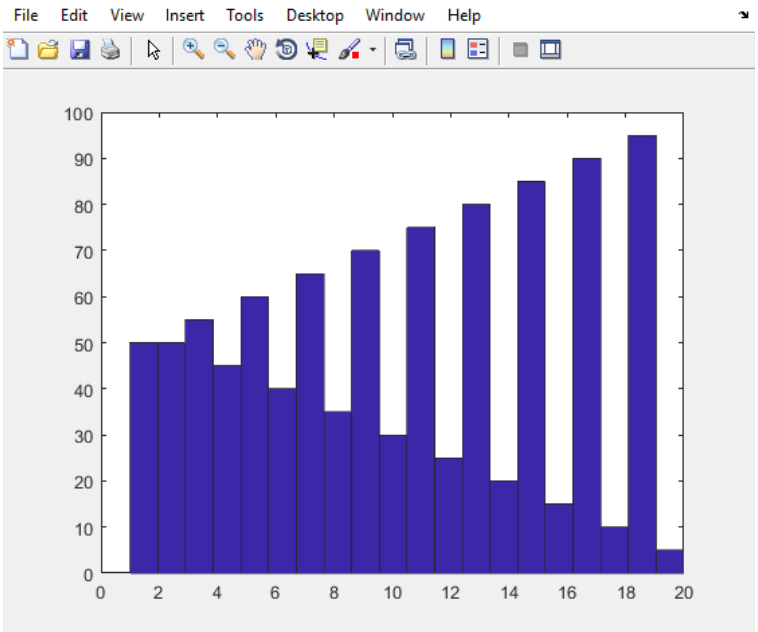

6. Histogramy dla danych z dataset.m:

dla n=10:

dla n=20:

Faktyczny rozkład to rozkład z liczbą przedziałów 20.
